

Transformational Change Pledge - 2030

This Transformation Change Pledge is signed on this ____ day of _____, 2017 by the City of _____ with sincere determination to offset 100% of our community's electric needs with renewable energy by 2030. The intention of this pledge is to notify our citizens that our human wellbeing and economic prosperity is best delivered by clean, renewable and affordable energy; and nothing short of meeting this goal will provide our citizens with the opportunity for a prosperous future.

It is hereby recognized that 100% clean energy will offset our city's residential, commercial, municipal, special district and industrial electricity needs by 2030.

It is hereby recognized that 100% of the clean energy will be provided by actual renewable energy infrastructure and the use of renewable energy certificates can only be counted if the renewable energy credits are attached (or bundled) to our constituent's tax revenue.

It is hereby recognized that our current power service portfolio does not responsibly provide a satisfactory mix of renewable energy sufficient for the economic, social and environmental conditions our community requires for a sustainable future.

It is hereby recognized that our citizens, businesses, community leaders and fellow city employees and elected officials hold the city accountable to meet 100% renewable energy by 2030 and performance progress reports shall be updated and presented to council for review twice annually.

I, _____, hereby pledge to reallocate city resources and re-prioritize city activities for the purpose of responsibly and quickly providing our community with 100% clean energy. I understand this re-prioritization is in the best interest of our community's future as well as the broader world.

The Transformational Change Pledge – 2030 is free to use "as is" and the language shall not, under any conditions, be changed or amended.
